Overview

Using Maven Analytics' CRM Sales Opportunities dataset — 8,800 deals spanning Q4 2016 through Q4 2017, across 30 sales agents, 6 managers, 3 regional offices, 85 client accounts, and 7 products — I designed a 3-page Power BI report (Executive Summary, Team & Manager Performance, Trends & Pipeline Health) with cross-filtering by quarter, manager, and product. The goal: give managers a fast read on revenue health, and agents a clear view of their own pipeline and close speed.
